DETAILED ACTION

It is noted that re-introduction of species I as claims 39-49 resulted in further restriction requirement.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 23-27, drawn to a polymer optical component, classified in class 359, subclass 883.
- II. Claims 28-38 and 50-61, drawn to a method of forming the component, classified in class 427, subclass 162.
- II. Claims 39-49, drawn to a plastic component, classified in class 427, subclass 164.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions (I and II) and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as colloid particles that are one of a cathodic and anodic polarity while providing an abrasion resistant and water resistant coating. Invention II has separate utility such as the multi-layer surface abrasion

resistant coating and tie-bond layer that are formed by a single wet coating. See MPEP § 806.05(d).

When inventions I and II are elected, further restriction is applied:

3. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the polymer does not require the step of permitting the particles over a predetermined time period by a zeta potential.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be

examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to EUNCHA P. CHERRY whose telephone number is 571-272-2310. The examiner can normally be reached on M-F 6:30-4:00, alternate Fridays off.
